Lifting capacity	1.650 kg	2.200 kg
Tipping load	1.450 kg	2.054 kg
Lifting height	2.825 mm	2.450 mm
Length without bucket	2.975 mm	3.054 mm
Width	1.080 mm	1.080 mm
Machine height	2.300 mm	2.300 mm

¹ Measured with standard version and earthbucket.

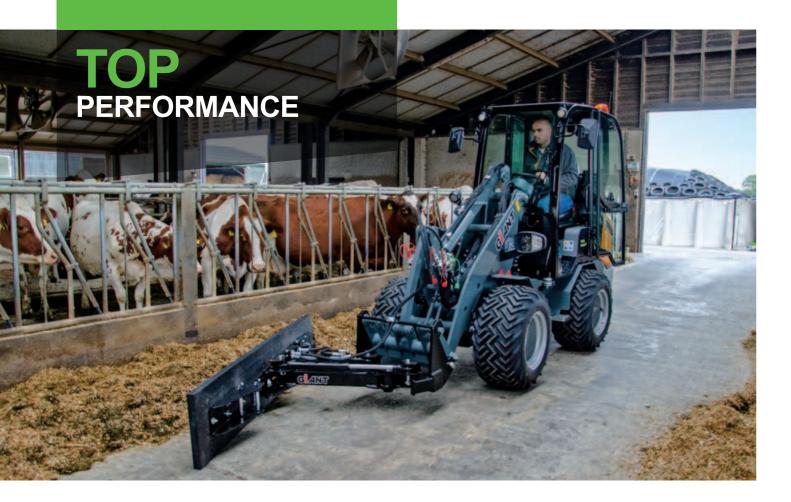

The G2200E and G2200E X-TRA are 2.2 tonne wheel loaders and the first electrical machines produced by TOBROCO-GIANT. These 2.2 tonne wheel loaders combine the best of both worlds with the advantages of an articulated loader and virtually silent operation with zero emissions. This makes the compact loaders ideal for indoor use applications or construction sites in urban areas.

TOBROCO-GIANT has the G2200E models completely in-house management developed and only works with the best components from suppliers such as Jungenheinrich, Bosch Rexroth, Comer and Hydac. For high reliability and maximum use of the machines, all parts are extensively tested under harsh conditions. This results in a proven reliability. Low running costs and a high residual value.

- **5.** MANEUVERABILITY AND STABILITY
 - The articulated pendulum system ensures maneuverability and stability.
- the G2200E makes it possible to work in places with limited space.

"We see a big financial gain from owning electrical machines."

- Michael Niemann, Buus Landscaping

EXCEPTIONAL PERFORMANCE

The G2200E is equivalent to the diesel models in terms of power, compact dimensions and manoeuvrability. At the same time, the G2200E does its job emission-free and silent. Properties that people and animals long for.

The G2200E loaders are standard equipped with a 48V lithium-ion battery and two separate electric motors, 6.5 kW for the drive and 12 kW for the working hydraulics. The 6-ton axles and four-wheel drive give the machines a pulling force of 12,500 N, so that there is always enough ability. The two independent electric motors make the machine more efficient to operate.

ACCURATE TASKS

Three speeds can be selected to perform tasks to be performed accurately. In ECO mode, the machines a top speed of 5 km/h, the standard mode offers a top speed of 12 km/h and the Full Power mode is the fastest setting of the machine with a top speed of 18 km/h.

With a lifting height of 2.85 meters and a capacity of 1,650 kg, the G2200E can be used perfectly when height is important. The G2200E X-TRA has a lifting capacity of 2,200 kg, a lifting height of 2.45 meters and has been specially developed for extreme heavy work and work in construction and earthmoving.

STABILITY AND MANEUVERABILITY

The articulated pendulum system gives the G2200E a lot of stability and agility. The system ensures that all four the wheels remain on the ground, even when working on uneven terrain. This makes it not only safe to work, but in addition, there is always sufficient traction.

TOBROCO-GIANT's lithium iron phosphate batteries score higher than traditional lead-based batteries with their performance, fast charging times and the fact that the batteries last up to three times longer. The G2200E X-TRA can be equipped with a 60A built-in charger, which uses a standard 230V power supply. In addition, customers can opt for an external charger. These chargers are available in 150A and 300A, making it possible to charge a battery for 50% within 30 minutes.

LITHIUM IRON PHOSPHATE BATTERY

TOBROCO-GIANT only offers high quality LFP (Lithium Iron Phosphate) batteries. These batteries have, among other things, the properties to recharge a lot of energy in a short time and have the highest degree of safety compared to NMC and lead-containing batteries. TOBROCO-GIANT offers three lithium iron phosphate batteries with a capacity of 260 Ah, 390 Ah or 520 Ah. Dependent of the choice, one battery charge is sufficient to operate under normal conditions to work 4, 6 or 8 hours. So there is more than enough energy to work all day long.

"Within five minutes we were convinced of the G2200E X-TRA. The machine is powerful because you have the power available immediately. By the three different driving modes, it is always possible to to work precisely. In addition, the machine lifts simply a pallet of vowels." - Jeroen Hup, Hup Paving

360° all-round view, from the cab

The G2200E machines have been extensively tested for safety by an independent body and internationally certified on the field of ROPS/FOPS security. The operator's central position and the use of narrow stiles and a skylight provide 360-degree visibility around and on the implement. This ensures that work is carried out efficiently and safely.

ELECTRONIC CONTROL

Information regarding the battery level, energy consumption, power and other indicators can be read from the dashboard so that this important data is always visible during work.

500+ attachments

Our attachments are developed entirely in-house so that they deliver the best results when working on our machines. TOBROCO-GIANT offers more than 500 different attachments so your machine can be used all year long. By choosing the right attachment it is possible to adjust your GIANT to working conditions for agricultural purposes, construction, material handling, private use and many other areas of application. Get every job done with just one machine!

HYDRAULIC QUICK COUPLER

The G2200E models are standard equipped with a hydraulic quick coupler as a standard. This makes it possible to change attachments safely and within seconds.

MOUNTING SYSTEMS

TOBROCO-GIANT offers a wide range of mounting systems, enabling you to use the attachment that you already have.

One machine for every job

MAINTENANCE

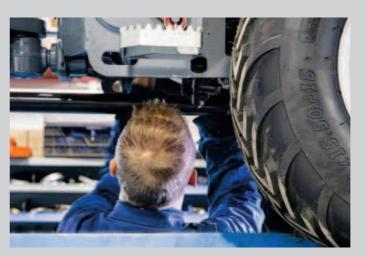

The G2200E models are easy to maintain because service points are easy to access. Hydraulic system and battery are freely accessible via the easy-to-use open service valves. This ensures that daily checks and maintenance can be carried out quickly and safely way can be performed.

GENUINE GIANT PARTS

The usage of genuine GIANT parts ensures reliable, efficient and safe operation of your machine. We only use the best quality components and test them severely before we introduce a new model. All these parts are vital for the best possible performance and minimising downtime. Keeping your GIANT 100% original saves money for the owner because of reduced maintenance costs and results in a higher resale value once the machine is resold.

SERVICE & SUPPORT

At TOBROCO-GIANT we offer support, service and high quality At TOBROCO-GIANT we know all the details about our parts to protect the investment that you have made in GIANT machinery. Together with our dealers we are available to make sure that your machine performs in the best possible way. This increases your productivity and will result in an even better return on your investment.

TRAINING

machines. That is why we offer an extensive training program to our dealers. Not only on the newest features or attachments, but also on how to service a machine to the highest standards.

"Developed in The Netherlands, built for the world"

Within 25 years, TOBROCO-GIANT has grown into a global player in compact machines with one of the broadest portfolios in the industry. The wide range of implements ensures that all work can be carried out with one machine. This means that GIANT machines can be used all year round for all kinds of work.

In a modern factory in the Netherlands, machines and attachments are developed and produced in-house. By using the most modern technology, ensuring continuous innovation and applying the best components from Kubota, Bosch Rexroth and Comer, GIANT machines and attachments are produced with the greatest care and quality.

Every day, the team of more than 500 employees in the Netherlands, Hungary and America focuses with passion and enthusiasm on complete customer satisfaction.

THE FUTURE IS ELECTRIC

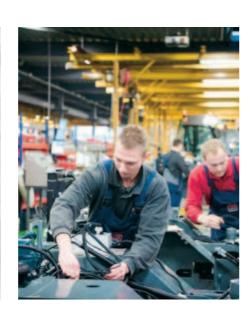

The demand for compact electrical equipment is an unstoppable trend. With Jungheinrich, TOBROCO-GIANT has found a global and reliable partner with expertise when it comes to developing electrical machines. Everything is aimed at developing an electric version of each GIANT along to the diesel version in the long term.

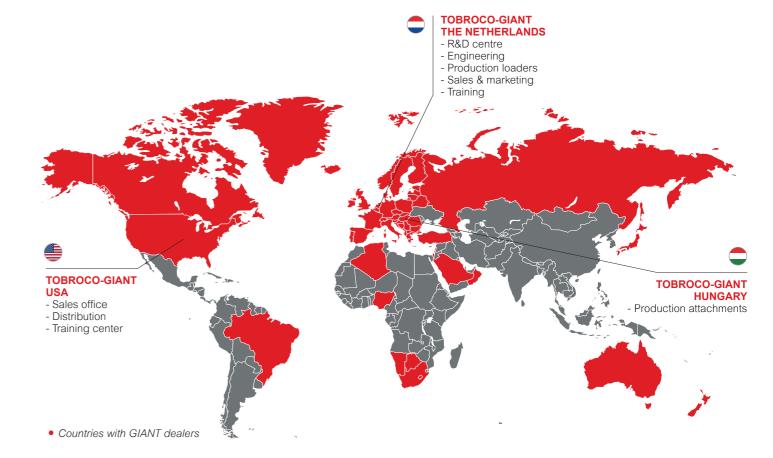

DEALER NETWORK

With a large network of dedicated dealers we like to be close to our customers to provide the machines, service and parts that you demand. All dealers are supported by a team of experts from the head office of TOBROCO-GIANT in Oisterwijk, The Netherlands.

ALL MODELS

TOBROCO-GIANT has been manufacturing high-quality GIANT machines and attachments since 1996 when we opened our first factory in The Netherlands. Today, TOBROCO-GIANT offers one of the broadest product portfolios in the business with 35 different models sold in 60 countries. In addition to machines with motors from 20 hp to 76 hp, TOBROCO-GIANT also supplies electrical machines and a complete line of compaction machines. TOBROCO-GIANT grows into a full-liner in compact and durable equipment.
