

COMPACT DESIGN, **BIG PERFORMANCE**

GIANT[®]
BY TOBROCO

G2200E

COMPACT, POWERFUL, 100% ELECTRIC

MODELS

G2200E | G2200E X-TRA | G2200E TELE

STANDARD / X-TRA / TELE

DISTINCTIVE FEATURES
The G2200E and G2200E X-TRA are 2.2-ton wheel loaders and the first electric machines developed entirely in-house by TOBROCO-GIANT. These 2.2-ton wheel loaders combine the best of both worlds with the advantages of an articulated loader and virtually silent operation without emissions. Recently, the G2200E TELE has been added, a variant with a telescopic boom. Thanks to the emission-free drive, the compact (telescopic) wheel loaders are ideal for working in confined spaces or urban areas.

The G2200E series uses high-quality components such as Jungheinrich, Bosch Rexroth, Comer, and Hydac. For high reliability and maximum utilization of the machines, all parts

are extensively tested under harsh conditions. This results in maximum operational reliability, low operating costs, and high residual value.

TYPES	 G2200E	 G2200E X-TRA	 G2200E TELE
Service weight ¹	2.200 kg	2.200 kg	2.300 kg
Lifting capacity	1.650 kg	2.200 kg	1.500 kg
Tipping load	1.450 kg	2.054 kg	see graph
Lifting height	2.825 mm	2.450 mm	3.395 mm
Length without bucket	2.975 mm	3.054 mm	3.060 mm
Width	1.080 mm	1.080 mm	1.080 mm
Machine height	2.300 mm	2.300 mm	2.300 mm

¹ Measured with standard version and earthbucket.

KEY FEATURES

- 1. COMFORTABLE WORKING** - A spacious and comfortable working environment.

2. SAFE WORKING - The cab and safety roofs are internationally certified for ROPS/FOPS protection.

3. LITHIUM-IRON PHOSPHATE BATTERY - These machines are equipped with a safe and efficient lithium-iron phosphate battery, incorporating the latest lithium technology.

4. MAINTENANCE - The maintenance-free battery and electric motors result in lower maintenance intensity compared to fuel-powered machines.

5. MANEUVERABLE & STABLE - The articulated pendulum system ensures maneuverability and stability.
- 6. MULTIFUNCTIONAL** - Easily switch attachments and adapt the machine to your tasks.

7. POWERFUL & PRODUCTIVE - Equipped with two independent electric motors for an optimal and efficient system.

8. QUIET OPERATION - Ideal for working in quiet areas to avoid noise pollution.

9. SPEED - Three driving modes for precise tasks (0-4.5 km/h, 0-12 km/h, 0-18 km/h).

10. COMPACT DESIGN - The compact design of the G2200E allows working in tight spaces.

TOP PERFORMANCE

G2200E TELE

“We see significant financial gains from owning electric machines.”

- Michael Niemann, Buus Landscaping

EXCEPTIONAL PERFORMANCE

The G2200E offers impressive performance that rivals conventionally powered diesel machines. With its compact dimensions and excellent maneuverability, the G2200E is ideal for various applications. Moreover, the G2200E operates emission-free and quietly, creating a pleasant environment for both people and animals.

The G2200E wheel loaders are standard equipped with a 48V lithium-ion battery and two separate electric motors, 6.5 kW for driving and 12 kW for work hydraulics. The 6-ton axles and four-wheel drive provide the machines with a traction force of 12,500 N, ensuring sufficient power at all times. The two independent electric motors make the machine more efficient to operate.

G2200E X-TRA

PRECISE TASK EXECUTION

Three speeds can be selected to perform tasks accurately. In ECO mode, the machines have a top speed of 5 km/h, the standard mode offers a top speed of 12 km/h, and the Full Power mode is the fastest setting with a top speed of 18 km/h. With a lifting height of 2.85 meters and a lifting capacity of 1,650 kg, the G2200E offers an ideal balance between height and lifting power. This machine is perfect for various applications and offers reliable performance. The G2200E X-TRA has a lifting capacity of 2,200 kg and a lifting height of 2.45 meters. Developed for heavy-duty work in construction and earthmoving, it offers robust performance. The G2200E TELE has an impressive lifting height of 3.4 meters, making it ideal for tasks requiring extra reach.

G2200E

COMPACT DESIGN

G2200E

CHARGING AS NEEDED

The lithium-iron phosphate batteries from TOBROCO-GIANT outperform traditional lead-acid batteries with their superior performance, fast charging times, and a lifespan that is up to three times longer. The G2200E can be equipped with a built-in charger of 40A or 60A, using a standard 230V power supply. Additionally, customers can choose an external charger on-site. These chargers are available with an amperage of 150A and 300A, allowing a battery to be charged to 50% within 30 minutes.

LITHIUM-IRON PHOSPHATE BATTERY

TOBROCO-GIANT offers only high-quality LFP (lithium iron phosphate) batteries. These batteries have the properties to charge a lot of energy in a short time and have the highest safety rating compared to NMC and lead-acid batteries. TOBROCO-GIANT offers three lithium-iron phosphate batteries with a capacity of 260 Ah, 390 Ah, or 520 Ah. Depending on the choice, one battery charge is sufficient to work for 4, 6, or 8 hours under normal conditions. There is more than enough energy to work all day long.

STABILITY AND MANEUVERABILITY

The articulated pendulum system gives the G2200E great stability and maneuverability. The system ensures that all four wheels remain on the ground, even when working on uneven terrain. This not only ensures safe working but also provides sufficient traction at all times.

“We were convinced of the G2200E X-TRA within five minutes. The machine is powerful because you have the power available immediately. With the three different driving modes, it is always possible to work precisely. Additionally, the machine easily lifts a pallet of pavers.” - Jeroen Hup, Hup Bestrating

SAFE AND COMFORTABLE WORKING

The machines are standard equipped with a safety roof and can optionally be equipped with a foldable safety roof or full-option cab. The spacious and accessible cab of the G2200E is designed for optimal ease of use. The steering column is adjustable in height and depth and equipped with an LCD screen where all necessary information can be easily read. During the use of the multifunctional joystick, the operator can rest their arm on an ergonomically shaped armrest. Important buttons are within easy reach on and next to the joystick.

360° view around, from the cab

The G2200E machines have been extensively tested for safety by an independent body and internationally certified for ROPS/FOPS protection. The central position of the operator and the use of narrow pillars and a roof window provide 360-degree visibility around and on the tool. This ensures that tasks can be carried out efficiently and safely.

ELECTRONIC CONTROL

Information regarding battery level, energy consumption, warning signals, and other indicators can be read from the dashboard, ensuring that these important data are always visible during work.

ATTACHMENTS

WIDE VARIETY WITH 700+ ATTACHMENTS

Our attachments are developed entirely in-house, ensuring they deliver the best performance with our machines. TOBROCO-GIANT offers more than 700 different attachments so that your machine can be used all year round. By changing tools, it is possible to easily adapt your GIANT for work in the agricultural sector, construction & demolition, infrastructure, terrain maintenance, and many other application areas. Complete every job with one machine!

HYDRAULIC QUICK-CHANGE SYSTEM

The G2200E is standard equipped with a hydraulic quick-change system. This allows attachments to be changed safely and within seconds.

QUICK-CHANGE SYSTEMS

We offer a wide range of quick-change systems, allowing you to continue using the attachments you already have.

MAINTENANCE & SERVICE

MAINTENANCE

The G2200E models are easy to maintain because service points are easy to access. Hydraulic system and battery are freely accessible via the easy-to-use open service valves. This ensures that daily checks and maintenance can be carried out quickly and safely way can be performed.

GENUINE GIANT PARTS

The usage of genuine GIANT parts ensures reliable, efficient and safe operation of your machine. We only use the best quality components and test them severely before we introduce a new model. All these parts are vital for the best possible performance and minimising downtime. Keeping your GIANT 100% original saves money for the owner because of reduced maintenance costs and results in a higher resale value once the machine is resold.

SERVICE & SUPPORT

At TOBROCO-GIANT we offer support, service and high quality parts to protect the investment that you have made in GIANT machinery. Together with our dealers we are available to make sure that your machine performs in the best possible way. This increases your productivity and will result in an even better return on your investment.

TRAINING

At TOBROCO-GIANT we know all the details about our machines. That is why we offer an extensive training program to our dealers. Not only on the newest features or attachments, but also on how to service a machine to the highest standards.

THE COMPANY ENGINEERING AND PRODUCTION UNDER ONE ROOF

*“Developed in **The Netherlands**,
built for the world”*

In more than 25 years, TOBROCO-GIANT has grown into a global player in compact machines with one of the broadest portfolios in the industry. The wide range of attachments ensures that all work can be carried out with one machine. This means that GIANT machines can be used all year round for all kinds of work.

Attachment equipment is developed in-house at TOBROCO-GIANT in the Netherlands and manufactured in our own factory in Hungary. By using the most modern technology, ensuring continuous innovation and applying the best components, GIANT machines and attachments are produced with the greatest care and quality.

Every day, the team of more than 600 employees in the Netherlands, Hungary and America focuses with passion and enthusiasm on complete customer satisfaction.

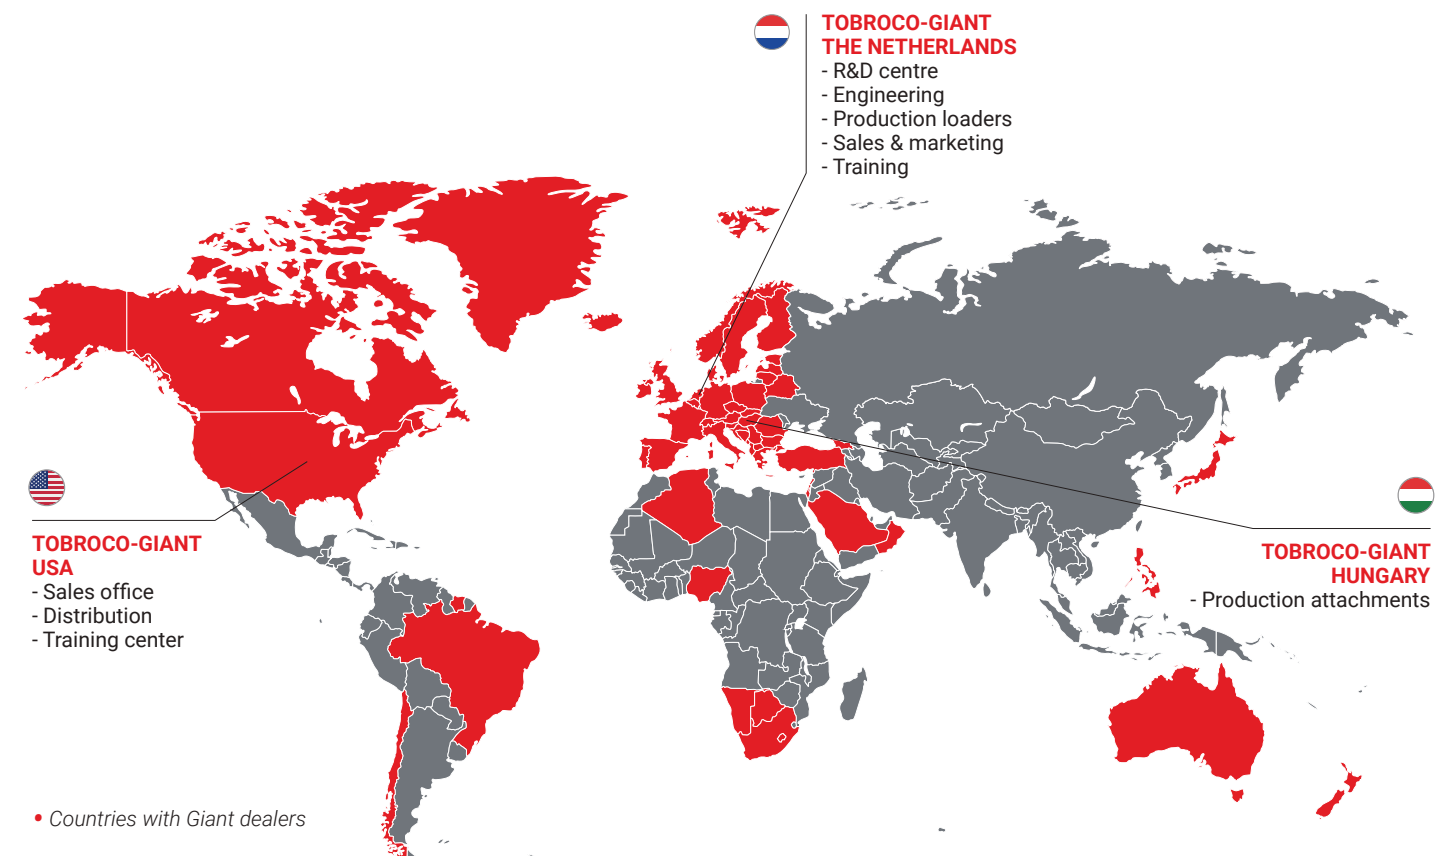

As a producer of wheel loaders and attachments, TOBROCO-GIANT knows better than anyone how important an attachment is for your machine to perform optimally. The goal of the attachments team is to let the user get the best possible return from the GIANT.

We have more than 700 different attachments available so that the GIANT machines can change from an earth-moving machine to, for example, a sweeper, paving machine, feeding machine, lawn mower, hedge trimmer, snow blade, excavator or forklift.

Our engineers design for each GIANT model their own line of attachments, tailored to the characteristics and performance of the machine. As a result, for example, we have already included more than 45 different variants of Earth buckets in our standard range.

The engineering team is constantly expanding customerspecific attachments by testing and improving our existing line of attachments.

In addition to our own attachments engineering department, TOBROCO-GIANT also has its own production locations in Oisterwijk (NL) and Füzesabony (HU). Our factory in Hungary was newly completed in 2022 with a work floor of more than 10,000 m². This modern factory has an extensive, CNC controlled, machine park with several robots and a fully automatic sand blasting and paint shop line for surface treatment of attachments.

ALL MODELS

TOBROCO-GIANT has been the manufacturer of GIANT machines and attachments since 1996 when we opened our first factory in the Netherlands. Today, TOBROCO-GIANT offers one of the broadest portfolios in the industry with more than 40 models in more than 80 countries. In addition to machines with engines ranging from 20 hp to 76 hp, TOBROCO-GIANT also supplies electric machines and a complete line of compaction machines. TOBROCO-GIANT is growing into a full-liner in compact and sustainable equipment.
